cmorq Introduces SwiftID: An Advanced Identity Verification Solution for Both Users and Businesses

Rio de Janeiro, Brazil - 17 April 2024

cmorq, a DeFi service that empowers users to navigate the new world of banking, is pleased to announce the launch of SwiftID at Web Summit Rio. SwiftID is an advanced identity verification solution designed to streamline the verification process for both users and businesses.

Key features of SwiftID include:

For Users: SwiftID streamlines the identity verification process, allowing users to complete KYC (Know Your Customer) and share their information with multiple companies. This eliminates the need for redundant verification procedures with various companies throughout the year.

For Businesses: SwiftID offers businesses a seamless solution without the need for complex integration. Its cost-effective approach ensures efficient and affordable identity verification for businesses of all sizes.

cmorq is a DeFi service that acts as a comprehensive platform empowering users on their journey towards financial liberation through decentralized finance. We strive to guide users through the intricate landscape of DeFi and Web3, providing essential tools for seamless entry and advancement in the crypto space. With our app, users can effortlessly fund their crypto wallets, execute exchanges, engage in lending or staking activities with their assets, and seamlessly transfer assets to their contacts. Moreover, our platform offers the convenience of aggregating all crypto-collectibles in one unified interface, providing users with a holistic view of their digital assets.
